

Storage Management Software

Lower Storage Management Costs

Today's businesses are faced with increasing data demands, complex systems and escalating costs. To assist businesses in meeting these ever increasing demands, PAC Storage offers StorView. the StorView Management Suite is a comprehensive, robust set of offerings that complement and add value to PAC Storage's family of products. StorView discovers, manages and evaluates storage utilization for SAN and direct attached storage environments while supporting today's leading operating systems including Windows and Linux. The suite consists of:

- StorView Local Manager
- StorView Global Manager
- StorView Alert™

StorView Local Manager provides a centralized, intuitive interface for local configuration and management that ships with PAC Storage systems. Online capacity allocation and expansion features are imperative for fast paced, constantly changing business environments. SAN LUN Mapping provides an easy to use method for mapping a LUN to a specific host while showing all physical connections. StorView Local Manager requires minimal storage experience in executing a business's storage strategy.

StorView Global Manager allows for accessibility from anywhere in the world, recognizing all PAC Storage systems on the network even if they are running on different operating systems. To maximize performance and ease administration, PAC Storage's Assistant automates storage configuration and allocation based on the customer's unique requirements. With real time notification of environment changes, Global Manager sends alerts to e-mail addresses, pagers and cell phones for fast response to potential business disruptions. StorView Global Manager provides capacity and performance planning through detailed performance statistics for maximum storage utilization that optimizes return on investment.

StorView Alert provides an added layer of security against unexpected downtime. Nonstop remote monitoring by PAC Storage support specialists ensure that parts and services are dispatched before business operations are interrupted. StorView Alert eliminates the need of maintaining a 24x7 support staff or waiting for service which are costly alternatives and risk business downtime. StorView Management Suite assists businesses in leveraging their storage resources to maximize the performance of business applications.

Features & Benefits

- **Comprehensive, robust suite of management software delivers maximum storage utilization**
- **Centralized management optimizes IT resources and accessibility**
- **Remote access from anywhere in the world improves business continuity**
- **Nonstop monitoring by nStor Specialists provides added layer of security against downtime**
- **SAN LUN Mapping provides quick connectivity between host and storage**
- **Dynamic Provisioning ensures ultimate flexibility in response to business changes**
- **Performance statistics provide capacity and performance planning for optimal utilization**
- **Alerts give immediate status of storage environment changes for quick problem resolution**
- **Graphical interface and consolidated toolbar deliver easy navigation**
- **Automatic storage configuration and allocation provide maximum storage performance**

Operating System Support

- Microsoft Windows 2000 & 2003
- Red Hat 7.3/9, Advanced Server 2.1, Red Hat Enterprise Linux AS
- SuSE 9 and SuSE Linux Enterprise Server 8

Hardware Requirements

- Personal computer or server with an Intel Pentium III type processor or compatible
- 128MB RAM
- 100MB disk space
- CD-ROM
- Network Interface Card or Loopback adapter
- Video Support 256-colors
(best viewed at 1024 x 768 resolution)

StorView Management Suite Compatibility

- Web browser software that support HTML 1.1 and Javascript 1.3, or better

PAC Storage

- PAC Storage FSATA-16 FC to SATA RAID Systems
- PAC Storage FFIBRE-12 FC to FC RAID Systems
- PAC Storage FSAS-12 FC to SAS/SATA RAID Systems
- PAC Storage SSATA-12 SCSI to SAS/SATA RAID Systems

Customization

- Change the look and feel
- Portable to any operating system
- Easy conversion to any language
- Modular design removes core code from being affected during customizing of look and feel

Warranty

90 days with 8/5 technical support.
Optional services, and advanced warranty contracts are also available.

Ease of Use

StorView's main screen provides a single view of all PAC Storage enclosure components, as well as configuration and monitoring tools from one window.

Added Layer of Security

StorView Alert™ to prevent unplanned downtime and provide an added layer of security for PAC Storage systems.

Storage Assistant

Automatic configuration of storage array, logical drives and server connections through the Storage Assistant.
